

Health

## Project Overview

# Better Health

# Together

# Project -

# Services

Community Partners International (CPI) is leading the Better Health Together project to implement the health services delivery component of the Access to Health Fund in Kayin and Mon States, Myanmar. Through the project, CPI is working to strengthen five ethnic and community-based health organizations (ECBHOs) to improve access to health care for vulnerable communities through the roll-out of an Integrated Package of Health Services (IPHS) across a network of 53 clinics, serving more than 300,000 people in 11 townships. The IPHS encompasses prevention and treatment of infectious diseases such as malaria and tuberculosis (TB), maternal, newborn and child health (MNCH), nutrition, sexual and reproductive health and rights (SRHR), and non-communicable diseases. Alongside improving access to early diagnosis and treatment, the project will enhance the accountability and responsiveness of health service providers, and will also seek to improve and expand TB prevention, detection and treatment.

## At a Glance

### Donor(s):

Access to Health Fund

### Project Duration:

January 2019 - December 2020

### Geographic Coverage:

Kayin State - Hlaingbwe, Hpa-An, Hpapun, Kawkareik, Kyainseikgyi, Myawaddy and Thandaunggyi Townships | Mon State - Bilin, Kyaikto, Thaton and Ye Townships
