

Knowledge Brokers and the Application for Evidence-Based Policy Decision-Making

24th - 25th April 2018

NAYPYITAW

Project Overview

Knowledge Broker Group in Myanmar

Community Partners International (CPI) and the Johns Hopkins Bloomberg School of Public Health's Applied Mental Health Research Group are working in partnership to establish a functional Knowledge Broker Group in Myanmar to fill the health policy research gap using a sustainable, effective and inclusive approach. Through this initiative, CPI aims to help synthesize and generate national, regional and global evidence required by decision makers and key stakeholders for the development of key health policy documents.

Research

At a Glance
