

Project Overview

Moving Myanmar's Health System Forward Initiative

Through the Moving Myanmar's Health System Forward (MMHSF) Initiative, Community Partners International (CPI) is helping to coordinate and build capacity among key stakeholders in Myanmar supporting efforts to achieve universal health coverage (UHC) by 2030, ensuring that all people can access good quality health care without suffering financial hardship.

Under the stewardship of the Myanmar Ministry of Health and Sports (MoHS), CPI is supporting coordination between ministries, members of parliament (MPs), UN and development agencies, ethnic health organizations (EHOs), civil society organizations (CSOs), and the private sector. CPI is helping to strengthen stakeholders' technical knowledge and capacity to support the achievement of UHC and the inclusive, equitable and accountable implementation of Myanmar's National Health Plan.
