Project Overview

Nae Thit Project

Community Partners International (CPI)'s Nae Thit ("New Day") Project supports grassroots organizations in Myanmar to develop and lead small-scale, community-led projects that promote the health and well-being of conflict-affected, hard-to-reach and under-served communities. The project focuses particularly on supporting organizations and initiatives with strong potential for impact and growth and that fill critical service gaps for populations in great need.

Applicant projects can be located in any state or region of Myanmar and grants are provided for periods of up to 12 months. In 2020, CPI will invest more than \$200,000 through the Nae Thit Project, providing grants to 13 grassroots organizations operating in 10 of Myanmar's 14 states and regions. These projects will provide direct services to more than 16,000 people.
